Chi Alpha: Christian Fellowship Full-stack Mobile Application

Sprint 4 Report

04/02/23 - 05/02/2023

Chi Alpha WSU

Web Ready

Vincent Yen, Justin Lee

What's New

- Nothing new of note

Work Summary

The development of the MVP was finished in the last sprint. The client has not determined whether or not to move forward with application deployment. Will be keeping in contact with the client in case deployment is desired in the future.

Completed Issues/User Stories

The completed work can be found in the master branch of the project repo provided by the following link: https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp

Incomplete Issues/User Stories

As mentioned earlier, the only thing that remains is to deploy the application. This issue is not being tracked on our project board since it is obvious what needs to be done; therefore, is determined to be unnecessary to be tracked as a task issue.

Files for Review

The mobile application component can be found at the following link: https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/tree/master/CACFResourceApp

The admin website component can be found at the following link:

https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/tree/master/cacfadminsite

Retrospective Summary

It was the first time for our team to develop a mobile application so I think it took a lot longer than it normally would take if we had prior experience in this area of development. Furthermore, our team is much smaller than most others so there is more burden for the team to bear. Having more time to plan the design and having clearer requirements would have helped to create something better, but with the given constraints I'm not certain how much things could have been improved.

Areas of Improvement

Communication has always been a struggle with the team. I think if the team had been able to communicate more clearly, frequently, and intentionally then this project would have gone much smoother.
