Chi Alpha: Christian Fellowship Full-stack Mobile Application

Sprint 1 Report

01/09/23 – 02/02/23

Chi Alpha WSU

Web Ready

Vincent Yen, Justin Lee

<u>What's New</u>

- Added UI styling
- Streamlined database model and queries for better efficiency
- Continued work on administration pages and event details page

<u>Work Summary</u>

The team has been working on determining what the features for the MVP should be. The focus for this sprint was to work on the admin page for announcements and the response forms for the event details page.

<u>Unfinished Work</u>

The usability of the admin pages will be reliant on whether the login function will work. Once the event details page is finished, the focus will be to finish the login feature and making sure that the admin pages will only render when the admin is logged in and not a general user.

<u>Completed Issues/User Stories</u>

Announcement Admin Page

https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/tree/25-announcement-page-admin

<u>Incomplete Issues/User stories</u>

All current Issues are being tracked at the following url:

https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/issues

As previously mentioned, issues are being completed in the order of priority and turnaround rates in order to deliver as many features as possible in time for production.

<u>Code Files for Review</u>

The following code files are being actively developed and are available for review for quality:

Announcement Admin Page

https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/tree/25-announcement-page-admin

Giving Page

https://github.com/WSUCptSCapstone-Fall2022Spring2023/cacf-fullstackapp/tree/34-event-page

<u>Retrospective Summary</u>

We've determined that we have to be more careful about how we utilize the remaining amount of time. There have been a number of issues that have arisen that could not have been foreseen that have caused setbacks on being able to deliver certain features to the application. We hope to have more foresight in our decisions.

<u>Here's What We'd Like to Improve</u>

- Improve team cohesion/communication so that the team can be on the same track.
- Feature integration

<u>Changes that are planned to be implemented in next sprint</u>

Completion of MVP features and begin testing and deployment
